

INOSTRI MONTI

VESUVIUS, THE BIG CONE.

Vesuvius dominates the beautiful gulf of Naples and it is the most known volcano in the world which still attracts the mass media attention.

The itinerary starts from 1000m high and it finishes at 1175m. We also go through some hairpin turn from which the view is fascinating. What is extraordinary is observing the previous lava flow really near your position.

During our climb, we can notice the old Somma Volcano which is separated from Vesuvius by Gigante Valley. We walk along the crater until we arrive at Capannuccia: here, we start climbing down.
